ABOUT ME

I am a dedicated and enthusiastic software engineer with nearly two years of experience in the field. Throughout my journey, I have acquired valuable expertise in full-stack web development, utilizing a variety of programming languages and frameworks including **JavaScript, HTML, CSS, Python, Java, React, Angular and Django**. As a data engineer, I possess knowledge and experience in **Spark**, enabling me to effectively handle large-scale data processing tasks. Moreover, I have proficiently used **Apache Airflow**, a powerful tool for orchestrating and managing data workflows and ingestion processes. Additionally, my solid grasp of **Continuous Integration and Continuous Deployment (CI/CD)** practices has allowed me to seamlessly integrate software delivery pipelines. Collaboration is fundamental to my work, and I thoroughly enjoy collaborating with diverse teams to successfully deliver projects. I am dedicated to continuous learning, always staying up-to-date with the latest technologies, and contributing to the growth of organizations. I would be honored to explore potential collaborations or opportunities where I can apply my skills as a software and data engineer.

WORK EXPERIENCE

○ Oct 2021- Present
Possible Incorporated (Vigo, Spain)

Software and data engineer

As a software engineer, I have had the opportunity to work with Django-React and Django-Angular stacks in several projects in the company, leveraging my skills in full-stack web development. I have been involved in projects where I implemented continuous integration practices, ensuring smooth and efficient software delivery. Additionally, as a data engineer, I had the privilege of working with the European Patent Office (EPO), where I played a crucial role in migrating their data warehouse (DWH) using Spark and Apache Airflow for data ingestion processes. This experience allowed me to apply my knowledge in handling large-scale data processing and integration, contributing to the successful migration of EPO's data infrastructure. These experiences have enriched my technical expertise and reinforced my commitment to delivering high-quality solutions.

● Feb 2021- Jul 2021
Saturdays.AI (Madrid, Spain)

Data engineer

During my internship at Saturday.AI, I had the valuable opportunity to gain hands-on experience and contribute to real projects with a meaningful positive impact on both individuals and the environment. One of the projects I actively participated in was the development of a Fake News detector, where I applied my programming skills in Python and expanded my knowledge of Machine Learning and Deep Learning techniques.
